Modern beauty:
Seamless splicing design provides a smooth and continuous surface to enhance the overall beauty of the space.

Easy to clean:
The non-porous surface effectively prevents the growth of bacteria and can be kept clean with a simple wipe.

Strong durability:
The material is strong and durable, scratch-resistant and stain-resistant, and can remain as new after long-term use.

Antibacterial properties:
The non-porous nature of acrylic artificial stone gives it superior antibacterial properties and is suitable for places with high hygiene requirements.

Various colors:
Can be customized in a variety of colors and textures to meet different design needs and adapt to a variety of decoration styles.

Trend

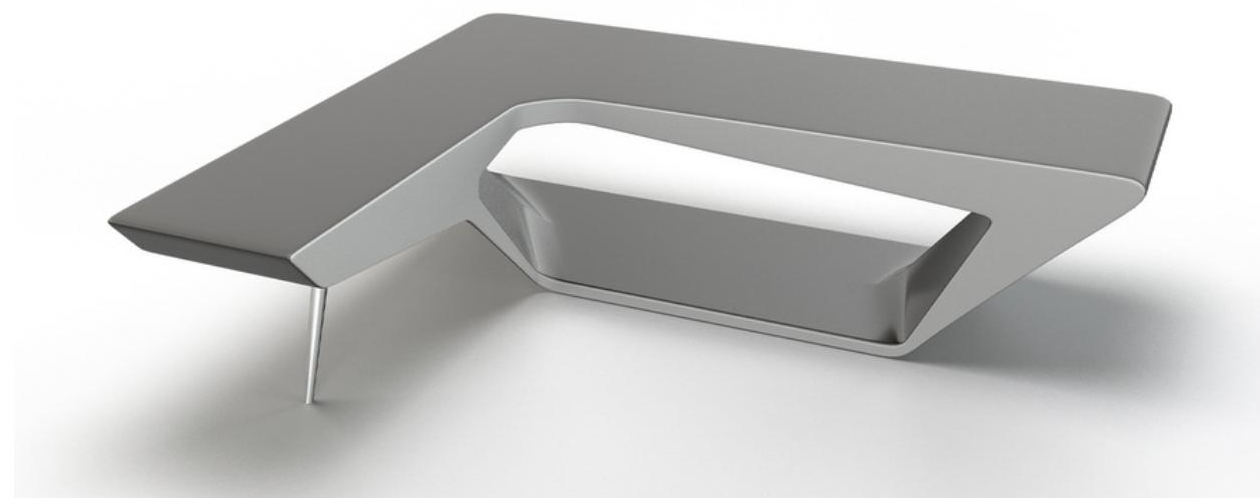

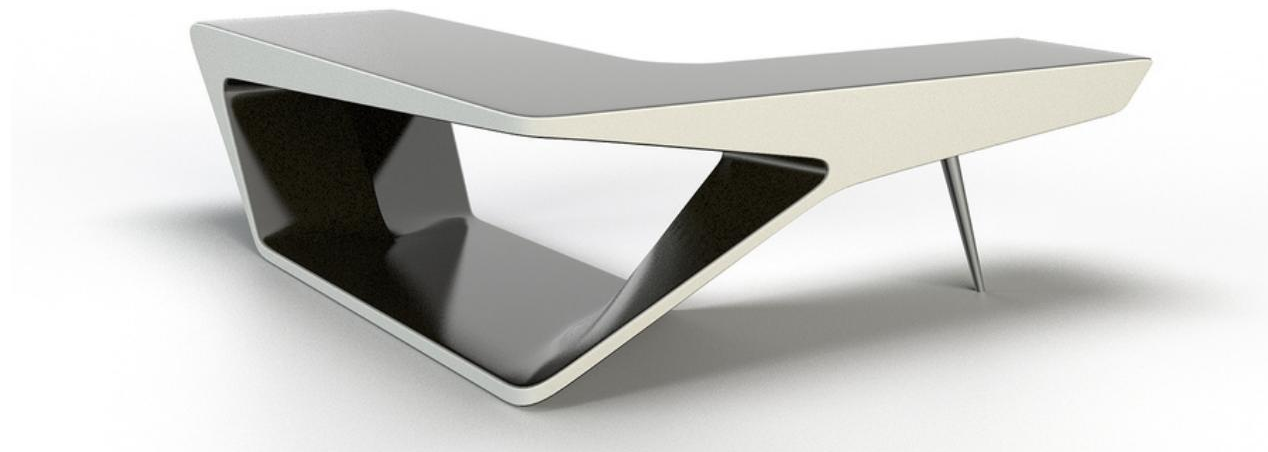

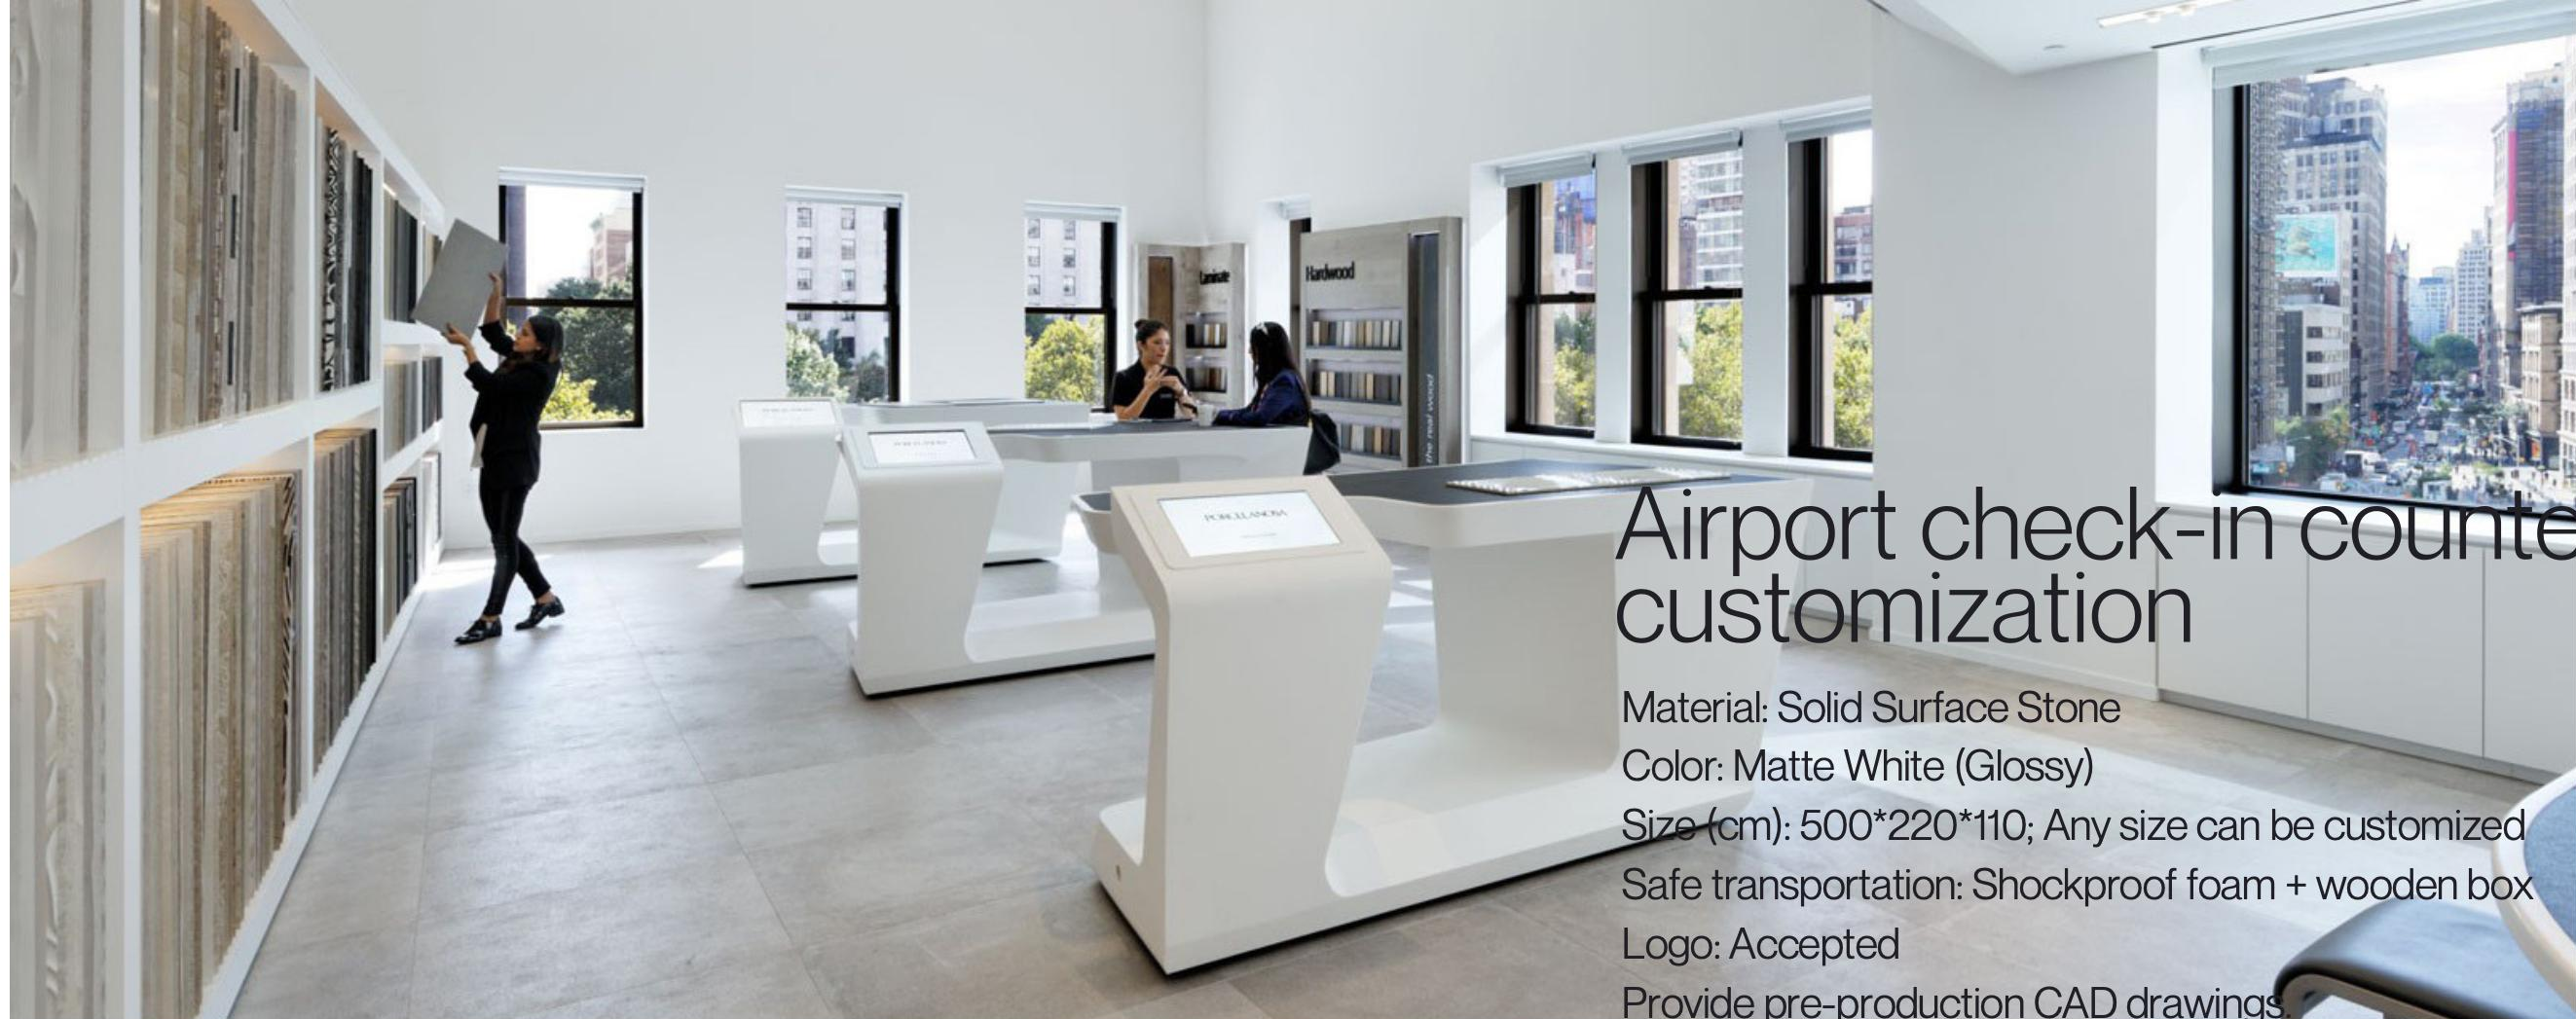

Commercial Bar

Applied to bars, hospitals, airports, banks, subway stations, commercial service centers and other places

Seamless design, smooth and beautiful surface, easy to clean, and excellent antibacterial properties. The material is sturdy and durable, scratch-resistant and stain-resistant. A variety of colors and customized shapes meet different design needs and enhance the professional and modern image of the reception area.
