Trends

I shape Reception

Applied to Office, hospitals, airports, banks, subway stations, commercial service centers and other places

Modern beauty:

Seamless splicing design provides a smooth and continuous surface to enhance the overall beauty of the space.

Easy to clean:

The non-porous surface effectively prevents the growth of bacteria and can be kept clean with a simple wipe.

Strong durability:

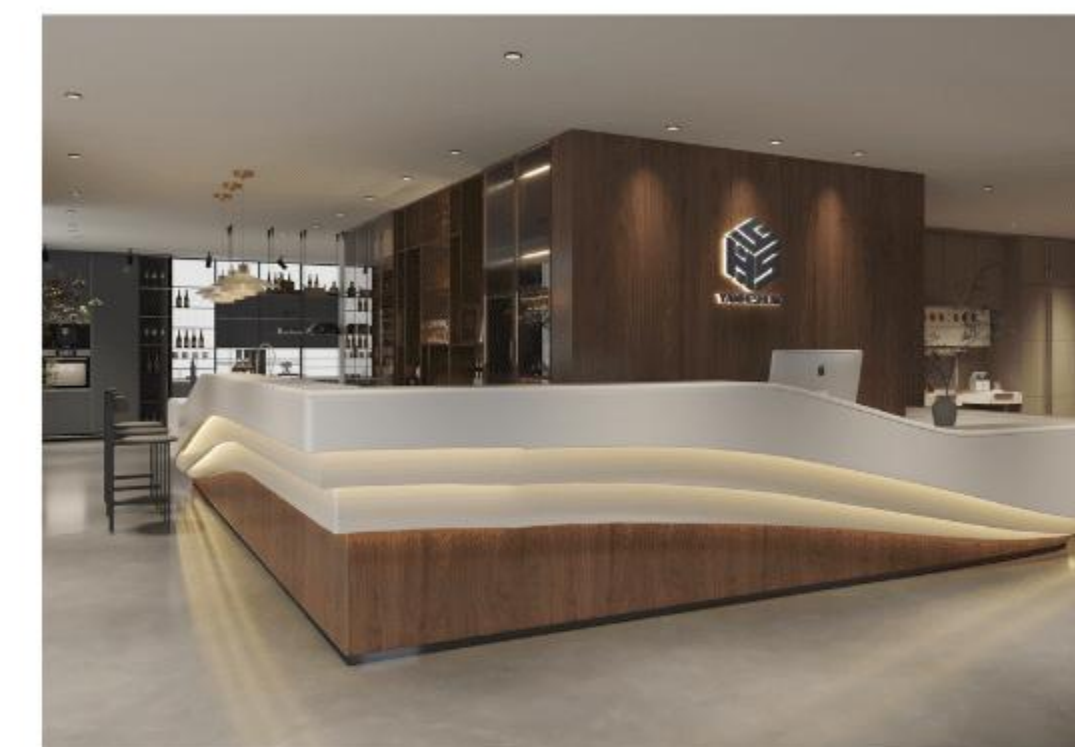

The material is strong and durable, scratch-resistant and stain-resistant, and can remain as new after long-term use.

Antibacterial properties:

The non-porous nature of acrylic artificial stone gives it superior antibacterial properties and is suitable for places with high hygiene requirements.

Various colors:

Can be customized in a variety of colors and textures to meet different design needs and adapt to a variety of decoration styles.
