COMPANY PROFILE

Located in the suburb of Kaiping, the township of the world relic Watchtower in Guangdong, Kaiping Fuliya Industrial Co., Ltd, is covering an area of 36,000 square meters with more than 100 workers. With the integration of the research, production, marketing and quality control and advanced automatic production line introduced from Germany, we are the high-tech corporation with good reputation in the acrylic solid surface industry whose annual output of panel materials can reach 300,000 pcs.

Our main products are classified into the following series: Koris® 100% acrylic solid surface, Koris® modified acrylic solid surface, high class sink, vanity and kitchen countertop. Our products are not only sold at domestic market but also abroad--more than 30 countries. Stable quality, diverse styles and perfect after-sales service help us to gain a lot of praises from our customers around the world, which changes into huge economic interest as well as significant influence.

DEVELOPMENT CORE

Besides,abiding by the motto of quality first,credit foremost and service best, we never forget to focus on the technical creation to better perfect our products so as to establish the position in the tough market. At present,our acrylic solid surface panels have topped much over other domestic similar products in quality which even can be compared with those made by the famous chemical giants like Dupont and LG.

With full passion and whole sincerity, we will be dedicated to the work in order to become the best brand in the field. Any visit, guidance and cooperation will be warmly welcomed. All these are for the better product, for the better service, and especially for you!

Special customized size is available: Length:1500~3660mm ; Width:450~910mm ; Thickness: 6~30mm

One of the key characteristics of Koris® is its thickness. Ranging from 6 to 12 mm, different designs are for different applications: 6mm can be specified for both furnishing and furniture paneling and interior walls; the 12 mm thickness can suit the most demanding applications such as kitchen tops, worktops.

MARKETING >>>

Business Philosophy

Market-oriented, product-led, profit-centered, sci-tech-tooled, innovation-powered, talent-based, logistics-focused, satisfaction-assessed.

Market Philosophy

To promote the brand and expand the market.

Marketing Philosophy

To win the customer's loyalty with sincerity and fairness.

Competitiveness Philosophy

A step ahead and no-stop.

PRODUCT PROPERTIES

Environment Friendly & Safety

With Aluminum filler, Koris® artificial stone is a non-toxic substance tested to meet the Food Grade Quality and it will not give off radiation harmful to its user.

Seamless Joints

Prevent the breeding of mould, bacteria and microbe.

Easy to care

Daily maintenance with water and dishcloth without waxing. If any scratch, use paper and water to remove it tenderly.

Heat Resistant & Fireproofing

Koris® artificial stone are flame retardant so that hot kitchen utensils can not leave mark on it.

Stain Resistant & Cauterization Resistant

Owing to vacuum encrypt processing, Koris® artificial stone has non-porous property so that it can withstand most household stain, laboratory chemicals.

Comfortable to touch

Unlike cold feel of the marmoreal marble, Koris® artificial stone is very comfortable to touch.

Durable

Koris® stone adopts macromolecule polymerization technology so that it can withstand hard impact.

Easy to process and simple to install

With standard joinery machines and tools, Koris® can be processed; complex design will be easy to put into practice. Weight half of the natural stone, it can be handled well during the transit or installation.

SCOPE OF APPLICATION

Koris® Acrylic Solid Surface performs well in safety, beauty, comfort, maintenance, seamless joints, resistance to stains and hygienic characteristics, making it the ideal material to equip the kitchens, toilets, bathrooms, hospitals, laboratories, hotels and restaurants.

Residential Space -Kitchen

Residential Space Bath

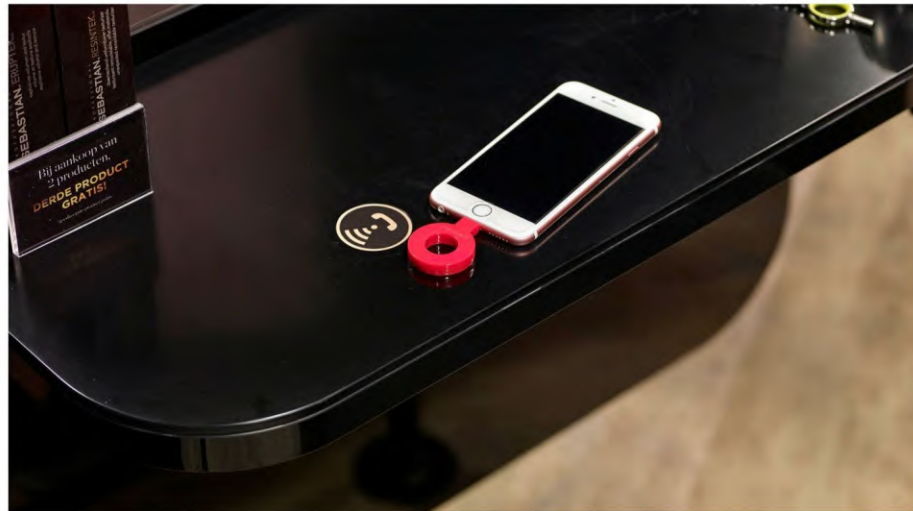

Commercial Bar

Commercial Place

Koris® was the obvious choice for projects as the color density and inconspicuous joining techniques, allowing the design to read as sculptured objects rather than traditional joinery pieces.

Acrylic solid surface through special-shaped processing to achieve a variety of wall shape, makes the space more beautiful and concise.

Nature Marble Solid Surface

Made of special raw material, Koris® acrylic solid surface offering superior soft surface touch, design possibilities and excellent long-term performance, it is used both in the home and in many different commercial environments, from hotels to healthcare, retail to marine.

As an integral part of any residential design, the kitchen needs to be welcoming and highly efficient--A place where the Koris® acrylic solid surface can provide a single subtle color that complements the surrounding soft color; if this is what you desire to achieve, consider Koris®.
